### **DETAILED ACTION**

1. The information disclosure statement (IDS) submitted on 08/13/2008 was filed after the mailing date of the non-final Office action on 02/14/2008. The submission is in compliance with the provisions of 37 CFR 1.97. Accordingly, the information disclosure statement is being considered by the examiner.

### ***Election/Restrictions***

1. Applicant's election without traverse of Group I, claims 1-7 in the reply filed on 08/13/2008 is acknowledged.
2. Claims 8-17 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 08/13/2008.

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-7 and 18 are rejected under 35 U.S.C. 102(b) as being anticipated by US 5632348 issued to Yunan. Yunan discloses a fluid activated detonating system comprising a shaped charge 58 placed within the hollow part of an ignition pellet. The top area of the pellet includes a rupture disc 66 formed by a groove 61. User-created

Art Unit: 3641

pressure within the borehole ruptures the disc, causing detonation of pellets 72, 74 and subsequently, shaped charge 58.

3. Claims 1-7 and 18 are rejected under 35 U.S.C. 102(b) as being anticipated by US 5040463 issued to Beaverson. Beaverson discloses a pressure activated power supply comprising a firing pin 24 disclosed within a firing pin block 26 with an annular groove. When the groove is broken by the required pressure of high pressure gas, the firing pin moves towards and ignites a detonator 14.

### ***Response to Arguments***

4. Applicant's arguments filed 08/13/2008 have been fully considered but they are not persuasive. Applicant argues that both of the applied references are not applicable as prior art because they do not disclose any of the elements being in "a fluid environment." However, the only place there is not a fluid environment is outer space and since neither reference discusses outer space it is inherent that the devices are used in a fluid environment, including the Earth's atmosphere.

### ***Conclusion***

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the

Art Unit: 3641

shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
